

This SDK provides programmatic control of the MoMS API through .Net.
Using this SDK, a client can trigger a send to a user over
SMS, MMS, or email, check the status of a send, manage opt-in status and more.

- SdkDocHtml/ contains the SDK .Net documentation (go to doc index.html to see the index)
- MogreetSDK/ contains the different source files in C# (open it to modify the SDK)
- SDKApplication/ contains the application in .Net (open it to test the SDK)
